

LIST OF TABLES, FIGURES, BOXES AND MAPS

TABLES

Table 1: Distribution of UGS facilities by region.....	28
Table 2: Ratio Working gas capacity/Gas consumption, World, 1970-2015.....	30
Table 3: Overview of underground gas storage in the world – Storage in operation at the end of 2015	31
Table 4: World gas supply and demand prospects to 2035	33
Table 5: Storage projects under construction as of end 2015	37
Table 6: Planned storage projects	39
Table 7: Total storage projects (under construction and planned).....	40
Table 8: LNG import terminals by country and region as of beg. 2016	84
Table 9: LNG import terminals under construction by region/country (as of beg. 2016)	88
Table 10: Potential and speculative LNG import terminals (as of beg. 2016).....	89
Table 11: Global FSRU capacity in operation as of beg. 2016	91
Table 12: 20 top terminals in terms of storage capacity	93
Table 13: Storage and send-out capacity at LNG terminals vs. UGS capacity in Europe	95
Table 14: EU LNG regasification terminals (beginning of 2016).....	121
Table 15: European LNG receiving terminals projects included in the 2015 PCI list and in the Strategy on LNG and gas storage.....	122
Table 16: Evolution of EU interconnection capacity	125
Table 17: Evolution of GasTerra SBU auction clearing prices	145
Table 18: Storage facilities mothballed or closed since 2010	150
Table 19: EU storage withdrawal rates considering the level of gas in storages at 30% of capacity..	173
Table 20: Storage obligations and strategic storage in the EU	184
Table 21: Underground gas storage facilities in Canada, in operation and planned (2015).....	198
Table 22: UGS facilities in Mexico (2015)	205
Table 23: LNG terminals and storage in Mexico	206
Table 24: Overview of gas storage in the United States, October 2015	210
Table 25: Gas storage projects in the United States	219
Table 26: LNG receiving terminals and storage in the United States.....	220
Table 27: Underground gas storage facilities in Argentina (2015).....	226
Table 28: LNG terminals and storage in Argentina	227
Table 29: Underground gas storage facilities in Brazil (2015).....	230
Table 30: LNG terminals and storage in Brazil	230
Table 31: LNG terminals and storage in other Central and South American countries (beginning of 2016)	232
Table 32: Planned underground gas storage in Albania	234
Table 33: Planned LNG terminal in Albania.....	235
Table 34: UGS facilities in Austria (2015)	239
Table 35: UGS facilities in Belgium (2015).....	243
Table 36: LNG terminals and storage in Belgium	244
Table 37: UGS facilities in Bulgaria (2015).....	250
Table 38: UGS facilities in Croatia (2015)	254

Table 39: Planned LNG terminal in Croatia	256
Table 40: UGS facilities in the Czech Republic (2015)	261
Table 41: UGS facilities in Denmark (2015)	266
Table 42: Storengy Storage groups in France	274
Table 43: UGS facilities in France (2015)	278
Table 44: LNG terminals and storage in France	279
Table 45: UGS facilities in Germany (2015)	289
Table 46: Storage projects under construction and planned in Germany	291
Table 47: Storage projects put on hold or cancelled in the past three years in Germany.....	292
Table 48: UGS facilities in Greece (2015)	303
Table 49: LNG terminals and storage in Greece	305
Table 50: UGS facilities in Hungary (2015)	309
Table 51: UGS facilities in Italy (2015)	319
Table 52: LNG terminals and storage in Italy	321
Table 53: UGS facilities in Latvia (2015)	325
Table 54: UGS facilities in Lithuania (2015)	329
Table 55: LNG terminals and storage in Lithuania	330
Table 56: UGS facilities in the Netherlands (2015)	337
Table 57: LNG terminals and storage in the Netherlands	338
Table 58: UGS facilities in Poland (2015)	344
Table 59: LNG terminal and storage in Poland	345
Table 60: UGS facilities in Portugal (2015)	348
Table 61: LNG terminal and storage in Portugal	349
Table 62: UGS facilities in the Republic of Ireland (2015)	352
Table 63: Planned LNG terminals in the Republic of Ireland.....	353
Table 64: UGS facilities in Romania (2015)	358
Table 65: Planned LNG terminal in Romania.....	359
Table 66: UGS facilities in Serbia (2015)	363
Table 67: UGS facilities in the Slovak Republic (2015)	367
Table 68: UGS facilities in Spain (2015)	373
Table 69: LNG terminals and storage in Spain	375
Table 70: UGS facilities in Sweden (2015)	378
Table 71: UGS facilities in Turkey (2015)	384
Table 72: LNG terminals and storage in Turkey	385
Table 73: UGS facilities in the United Kingdom (2015)	393
Table 74: Storage projects in the United Kingdom, under construction and planned (2015)	394
Table 76: UK storage projects, on hold or cancelled since 2012.....	395
Table 76: LNG terminals and storage in the United Kingdom.....	398
Table 77: LNG terminals and storage in other European countries.....	401
Table 78: Underground gas storage facilities in Armenia (2015)	402
Table 79: Underground gas storage facilities in Azerbaijan (2015)	404
Table 80: Underground gas storage facilities in Belarus (2015).....	407
Table 81: Underground gas storage facilities in Kazakhstan (2015)	410
Table 82: Underground gas storage facilities in Kyrgyzstan (2015)	412
Table 83: Underground gas storage facilities in Russia (2015)	419

Table 84: Underground gas storage projects in Russia, under construction, planned and potential (2015)	422
Table 85: Gazprom's operating and planned underground gas storage facilities in Europe	425
Table 86: Ukraine's gas indicators: transit, imports and consumption (2007-2015)	427
Table 87: Underground gas storage facilities in Ukraine (2015)	432
Table 88: Underground gas storage facilities in Uzbekistan (2015)	438
Table 89: LNG terminals and storage in Africa	441
Table 90: Underground gas storage facilities in Iran (2015)	445
Table 91: LNG terminals and storage in the Middle East	448
Table 92: Underground gas storage facilities in Australia (2015)	453
Table 93: Gas storage projects planned in China under the Five-Year Plan for Natural Gas (2011-2015)	460
Table 94: Underground gas storage facilities in China (2015)	463
Table 95: LNG import terminals and storage in China (operating)	465
Table 96: LNG import terminals in China (under construction, planned and speculative)	466
Table 97: LNG import terminals and storage in India	470
Table 98: Underground gas storage facilities in Japan (2015)	473
Table 99: LNG terminals and storage in Japan	475
Table 100: Underground gas storage facilities in New Zealand (2015)	477
Table 101: LNG terminals and storage in Pakistan	481
Table 102: LNG terminals and storage in South Korea	484
Table 103: LNG terminals and storage in Taiwan	486
Table 104: LNG terminals and storage in other Asian countries	489

FIGURES

Figure 1: Global UGS capacity by region, end of 2015	15
Figure 2: Global UGS working gas capacity by 2035	16
Figure 3: Global LNG import and storage capacity (current, under construction and planned as of beginning of 2016)	17
Figure 4: Evolution of global working gas capacity, 1970 -2015	26
Figure 5: Global underground gas storage at end of 2015 – by region	27
Figure 6: Global underground gas storage at end of 2015 – by type	28
Figure 7: World Top Ten storage countries, end of 2015	30
Figure 8: World – UGS working gas capacity to 2035	34
Figure 9: Estimated growth in working gas capacity to 2035, by region	35
Figure 10: Storage projects under construction by region	37
Figure 11: Storage under construction by type	38
Figure 12: Storage under construction and planned - Working gas capacity and withdrawal rates	38
Figure 13: Underground gas storage capacity in North America by 2035 (working gas capacity)	42
Figure 14: Working gas capacity of projects under construction and planned in North America	44
Figure 15: Outlook for European gas supply to 2035	48
Figure 16: Evolution of European yearly gas demand – ENTSOG Green Scenario	50
Figure 17: Changes in gas demand by the power sector, 2035 vs. 2015 – ENTSOG Green Scenario ...	51

Figure 18: Changes in peak gas demand by the power sector, 2035 vs. 2015 – ENTSOG Green Scenario	51
Figure 19: European gas production swings	53
Figure 20: LNG imports in the UK.....	59
Figure 21: Underground gas storage capacity in Europe by 2035 (working gas capacity).....	62
Figure 22: Working gas capacity of projects under construction and planned in Europe	63
Figure 23: Underground gas storage capacity in the CIS by 2035 (working gas capacity)	66
Figure 24: Underground gas storage under construction and planned in the CIS (working gas capacity)	67
Figure 25: Underground gas storage capacity in the Middle East by 2035 (working gas capacity).....	69
Figure 26: Underground gas storage capacity in China by 2035 (working gas capacity)	74
Figure 27: Underground gas storage in the CSG to LNG chain.....	76
Figure 28: Underground gas storage capacity in Asia-Oceania by 2035 (working gas capacity)	78
Figure 29: Imports of LNG by major regional markets/countries (1975-2015).....	79
Figure 30: Regional gas prices	81
Figure 31: Outlook for LNG demand to 2035	82
Figure 32: Outlook for effective liquefaction capacity vs. LNG demand to 2035	82
Figure 33: Capacity of planned/announced FSRUs in the world by region.....	91
Figure 34: Import and storage capacity at LNG receiving terminals, by major country/region	92
Figure 35: LNG storage capacity by region, existing, under construction and planned (as of beg. 2016)	93
Figure 36: Contribution of gas storage in European gas supply in winter 2014/15.....	99
Figure 37: Sources of supply for the daily peak demand on 5 February 2015.....	99
Figure 38: Henry Hub spot gas prices vs. US gas production and working gas inventories.....	102

BOXES

Box 1: Power-to-Gas: an emerging promising technology.....	47
Box 2: Improved N-1 calculation and gas storage	55
Box 3: Gas storage projects in Europe.....	62
Box 4: Ukraine uncertainty.....	67
Box 5: Underground gas storage in the CSG-to-LNG chain	76
Box 6: Bigger LNG tanks and FSRUs.....	93
Box 7: The key role of storage at market hubs	101
Box 8: A collapse in prices and summer-winter spreads.....	103
Box 9: Reductions in Groningen output in the first quarter of 2015	117
Box 10: Gazprom's pipeline projects to the EU.....	123
Box 11: The Infrastructure Package	126
Box 12: The importance of storage levels at the beginning of the withdrawal season.....	137
Box 13: CEER's recommendations for regulatory arrangements in the gas storage market.....	164
Box 14: A three-level approach in crisis management.....	170
Box 15: PCIs contributing to the Strategy for LNG and Storage.....	176
Box 16: New classification of US natural gas storage regions.....	212
Box 17: Additional underground natural gas storage regulation.....	222
Box 18: Integration of the Belgian and Luxembourg gas market.....	242
Box 19: An illustration of the use of flexibility on the Belgian market.....	243
Box 20: The North-South Link in France	271
Box 21: The EEG 2.0.....	283
Box 22: A move to shorter-term bookings in Germany	293
Box 23: A new interconnection agreement between FGSZ and Ukrtransgaz	307
Box 24: The Italian National Energy Strategy	312
Box 25: The gas crisis of February 2012 in Italy	315
Box 26: Future gas demand in the Netherlands: influence of the rate of development of sustainable energy.....	332
Box 27: Future gas supply and demand: National Grid Future Energy Scenarios 2015.....	390
Box 28: New Ukrainian Natural Gas Market Law	430
Box 29: The Central Asia-China Gas Pipeline.....	457
Box 30: History of gas storage	491
Box 31: Main operating characteristics of natural gas storage facilities	491
