About the author	2
Executive Summary	4
1. Introduction	6
2. The economic and energy landscape	7
2.1 A driver of global growth.....	7
2.2 Surging energy needs	8
2.3 Gas demand in Southeast Asia	9
2.4 The crucial role of the power sector	11
2.5 Major challenges in the energy sector	13
3. Gas-Coal competition in the power sector	16
3.1 Evolution of coal and gas prices	16
3.2 Cost of electricity generation	18
3.3 Environmental and financial issues	20
4. Natural gas and renewables	22
4.1 An ambitious development of renewables	22
4.2 Impact of renewable deployment on natural gas	24
4.3 Addressing variability of renewable power.....	27
5. Investment in gas and coal power plants	29
5.1 Existing gas and coal capacity.....	29
5.2 Gas and coal capacity under construction	29
5.3 National power development plans	31
6. Developing new reserves	37
6.1 Reserves depletion	37
6.2 Regional gas production	38
7. Development of gas infrastructure and security of gas supply: the role of the TAGP	39
7.1 Gas trade in Southeast Asia.....	39
7.2 Strategic reorientation of the TAGP	40
8. Conclusion.....	45
Annex 1: Future gas production in the major producing countries of the region	46
Annex 2: LNG imports and regasification terminals in Southeast Asia	50
Annex 3: The IEA Bridge Scenario.....	53
Annex 4: The ASEAN Power Grid	55
