

CONTENTS

About the author	2
Preface	5
Executive Summary	6
1. Global RNG production is surging	10
1.1 Global production reached 9.2 bcm in 2023 and approached 12 bcm in 2024	10
1.2 The multifaceted benefits of biomethane production	12
1.3 Rewarding positive externalities	13
2. Structural policy drivers: decarbonization, security of supply, methane emissions reduction	14
2.1 RNG is a key tool to meet decarbonization commitments by 2030 and beyond	14
2.2 Security of supply challenges brought RNG into focus	15
2.3 The Global Methane Pledge and COP29 Declaration are game changers for the sector	16
3. Market push: Main structural trends shaping the sector	18
3.1 The use of RNG as vehicle fuel is leading development across the world, maritime is taking off	18
Surging RNG demand by the transport sector: 4.1 bcm in 2023	18
The US is the largest user of RNG in the transport sector	20
European demand has tripled in three years	21
The European bio-LNG market is surging	22
Bio-LNG demand from the shipping sector is going to soar	23
3.2 The use of RNG in the industrial sector is growing	25
Recent examples of BPA signed by large corporations/industrial users	25
Towards a merchant biomethane market	27
3.3 Moving from supply to demand side incentives: biomethane blending obligations	28
3.4 Valuing and trading biomethane certificates	30
The role of biomethane certificates in Europe	30
The value of RNG credits in the US	31
The GHG Protocol should clarify guidance for biomethane certificates in voluntary markets	33
3.5 Valorization of by-products	34
Valorization of biogenic CO ₂ from biogas upgrading	34
Digestate is commercialized as biofertilizer	35
3.6 Adoption of innovative technologies	36
Unlocking hard-to-digest waste streams via gasification and pyrolysis	36
Power-to-methane (e-methane)	37
Production of biohydrogen from biogas/RNG	38
Technology providers are constantly innovating	39
Leveraging economies of scale and achieving cost reductions	39
3.7 M&A remains a key tool to enter the market, expand portfolio and acquire feedstock	41
Key investment themes in 2024	41
Recent acquisitions by energy majors/integrated energy companies	42
Energy utilities: ENGIE has strengthened its international biomethane position through acquisitions	45
Italy's biomethane in the spotlight	46
Investment funds: European funds lead RNG transactions	47
4. Europe continues to lead global biomethane production	49
4.1 European RNG production hits 5 bcm	49
4.2 The deployment of biomethane varies significantly among European countries	50
4.3 Thanks to its versatility, RNG can adapt to changing end-use priorities	52
4.4 Cross-border trade is rising, but the market remains fragmented	52
4.5 Bright outlook for European RNG production	54
5. North America: A tremendous growth in the RNG sector	57
5.1 United States: Energy utilities drive further RNG production growth	57
RNG production passes the 3 bcm mark	57
The IRA has given unprecedented growth to the US RNG sector	57
Regulatory policy alignment is critical for the RNG industry and supply growth	58
Growing RNG demand for transportation	60
The expansion to non-transportation applications will drive explosive growth	60

The RNG industry is positioned to continue thriving	63
5.2 Canada: RNG production grows significantly.....	64
Federal level	64
Provincial level.....	65
6. China: New progress in the commercialization of RNG, but development behind targets	68
Bio-natural gas is finally taking off	68
Several positive developments will further accelerate bio-natural gas production	68
The outlook for bio-natural gas demand is bright, but production offers a wide range of uncertainty	72
7. India: Bio-CNG is gaining momentum	73
Policy incentives to support CBG and set up the ecosystem.....	73
Accelerated deployment of CBG: 800 CBG plants in operation and under development	75
Growing investment by Indian oil and gas companies and the private sector.....	76
The bio-CNG sector is poised to grow exponentially	77
8. Brazil is positioning itself to be one of the leaders in the global RNG market	78
RNG production capacity grew by an average of 28% per year over the past five years.....	78
Demand for RNG is growing exponentially	78
Addressing the logistical issue.....	80
The Fuels of the Future Law is a transformative legislation for the RNG market	81
RNG sets to grow exponentially	82
9. RNG is going global: New producing countries	83
Announced plants in Mexico	83
Biomethane makes its debut in Central and South America	83
Rising Asia: New biomethane producing countries, new policies and new outlets	83
10. Conclusion: A transformative decade for RNG	86
ANNEX 1: What is RNG (biomethane)?	88
ANNEX 2: Focus on selected EU biomethane markets	89
Germany	89
France	92
Denmark	95
Italy.....	97
Netherlands.....	100
Sweden	102
Main References	104
Main Abbreviations.....	106
List of Figures, Tables, Boxes and Maps.....	108
