# Mastering RENEWABLE POWER

**LIVE ONLINE COURSE OVER 5 SESSIONS**

**Commences: 19<sup>th</sup> April 2021**

## Course Sessions

1. Renewable power growth, trends & energy mix disruption
2. Developing projects: phases, risks and key contracts
3. Renewable power projects compared & contrasted
4. Dispatchable and 'system-friendly' renewable power
5. Developing the investment case

## Benefits of Attending

- Understand the factors driving the growth of renewable power
- Review data and statistics on deployment trends, costs and other key metrics
- Learn how to develop renewable power projects
- Evaluate the contrasts between different types of renewable power, from both project development and energy mix perspectives
- Discuss how channel to market choices and value propositions are evolving, and the impact on project development and business case
- Learn new trends such as storage and 'flexibility'
- Quantify how multiple variables and risk considerations come together to determine the financial case for renewable power investments
- Stay up-to-date by project examples, business models and deployment approaches from across the world

## Online Course at a Glance

The online course will be delivered in 5 live interactive sessions. Each session will be 3 hours, including a 15-minute break. The live online course is powered by Zoom, which can be accessed via laptops, desktops or mobile devices.
