Mastering WIND POWER

An essential guide to the business of wind power project
planning & development

LIVE ONLINE COURSE OVER 5 SESSIONS

Commences: 23rd June 2021

Course Sessions

1. From wind flow to electricity: wind turbines and wind farms
2. Understanding and measuring wind resources
3. Successful delivery of wind power projects
4. Taking wind power offshore
5. Making money from wind power projects

Benefits of Attending

- Learn from global experiences in wind power project development
- Understand unique properties of wind resource, and how these feed into financial risk analysis
- Gain a business-focused, up-to-date perspective on current and emerging wind technology innovations and project delivery best practices
- Analyse and discuss practical and project delivery risks facing wind power projects, including key stakeholder engagements
- Get hands-on with a financial model to better understand financial risks and returns for wind power projects
- Compare and contrast the unique extra costs and complexities of offshore wind projects with those onshore
