

CONTENTS

Foreword	1
About the author	2
Objective and Structure of the report	6
Global biomethane production plants database	7
Objective	7
Sources of Information	7
Contents and Legend	8
Executive summary	10
1,000 biomethane production plants in the world soon	10
A six-fold increase in global biomethane production since 2010	11
The biomethane supply chain offers a unique set of benefits	11
Policy support is required to incentivize biomethane production	12
Bright outlook as biomethane expands its reach	13
I. Introduction: Biomethane goes global	15
1. What is biomethane?	16
2. Biomethane goes global: 720 operating plants at end 2017, 1,000 soon in 34 countries	16
3. Global biomethane production has increased six-fold since 2010	18
4. Drivers: transforming an environmental issue (waste) into a valuable renewable energy source, and much more	20
5. Support mechanisms are required to incentivize biomethane production	22
6. Biomethane applications are evolving	24
7. Proven and innovative technologies	26
8. Injection into the grid	27
9. Substrates vary amongst countries/regions	28
10. A substantial untapped potential	31
11. Future trends	32
Rapid growth in Europe	32
Rising production in North America	33
Surging production in Asia	34
II. BIOMETHANE TRENDS BY REGION AND COUNTRY	35
1. EUROPE	36
Austria	40
Denmark	41
Finland	43
France	45
Germany	46
Ireland	47
Italy	49
Netherlands	51
Norway	53
Sweden	55
Switzerland	57

United Kingdom.....	58
Other European countries.....	61
2. NORTH AMERICA.....	63
United States.....	63
Canada.....	63
Mexico.....	64
3. ASIA.....	65
China.....	65
India.....	67
Southeast Asia.....	68
Other Asian countries.....	70
4. CENTRAL AND SOUTH AMERICA.....	73
Brazil.....	73
Chile.....	73
Other Central and South American countries.....	73
5. AFRICA.....	75
6. CIS.....	76
7. MIDDLE EAST.....	77
III. CASE STUDIES.....	78
United States: rapid development driven by support to advanced biofuels.....	79
73 operating plants.....	79
The essential role of RFS.....	81
California will lead the RNG development with a Renewable Gas Standard.....	82
Financial support is substantial, but its level and durability are uncertain.....	84
Feedstock is not a limiting factor.....	85
82 projects under construction and planned.....	86
A huge potential for growth.....	89
Canada: RNG could provide 5% to 10% of gas consumption by 2030.....	91
Only 11 RNG facilities.....	91
New RNG policy at federal policy.....	91
Promising provincial developments.....	92
British Columbia.....	92
Quebec.....	93
Ontario.....	94
Proactive role of natural gas utilities.....	95
Woody resource potential is huge.....	95
RNG is an up-and-coming industry in Canada.....	95
Brazil: A huge potential.....	97
Driving forces.....	97
A huge untapped potential.....	97
Biomethane production is just starting.....	98
New policy incentives at national level.....	98
The RenovaBio policy.....	98
The national energy strategy.....	99

Regulation at government and state levels is progressing	99
An emerging giant biomethane producer?	100
Germany has led European biogas/biomethane production.....	102
The leading biogas and biomethane producer	102
Biomethane demand by sector	103
Biomethane demand has been driven by the EEG.....	104
Amendments to the EEG and biogas/biomethane trends	104
Biomethane technical potential	106
Future development.....	107
France: A hotspot for biomethane	108
Biomethane injection is taking off	108
Surging number of projects.....	109
Biomethane growth has been driven by favourable regulation	110
Obstacles to be overcome.....	111
A strong development potential	111
Future development.....	112
China: the emerging giant biomethane market	114
Biogas development is shifting towards large-scale plants with biogas upgrading.....	114
Main drivers for the development of biogas/biomethane in China	114
Policies on biogas/biomethane development.....	116
Financial incentives	117
State of development of the biomethane market	117
BNG has still some barriers to overcome.....	118
Recent regulatory developments.....	119
NEA's Notice on BNG of August 2018	119
NEA's Guidance Opinions on Promoting the Industrialization of BNG of February 2019.....	120
Future development.....	121
India: The Bio-CNG sector is ready for take-off.....	122
Bio-CNG: a new concept in India.....	122
A substantial biogas potential	123
New policy support and strong ambition.....	123
Energy from Urban, Industrial and Agricultural Waste/Residues.....	124
Galvanizing Organic Bio-Agro Resources Dhan (GOBAR-DHAN).....	124
National Policy on Biofuels.....	124
Sustainable Alternative Towards Affordable Transportation (SATAT).....	125
The transportation sector is the key focus.....	125
Focus on Haryana and Punjab states and straw burning	126
5,000 bio-CNG plants in the future? Key challenges and outlook	127
List of Figures, Tables and Boxes.....	129
References.....	130
