

## CONTENTS

About the author .....	1
Preface .....	3
Executive Summary .....	4
1. Despite the pandemic, global RNG production surged in 2020 .....	6
2. Government push: CO <sub>2</sub> and methane emissions reduction, security of supply and price stabilization .....	8
2.1 A powerful tool to reduce CO <sub>2</sub> emissions and tackle methane emissions, right now .....	8
RNG offers a double GHG emissions mitigation effect .....	8
Acceleration of decarbonisation policies around the world .....	8
Methane emissions in focus.....	9
Creating negative emissions with RNG as a transport fuel .....	11
RNG offers multiple other key benefits.....	12
2.2 Increasing security of supply and insulating economies from high energy prices .....	13
The cost issue of RNG is relative: surging natural gas prices have changed the picture.....	13
European RNG production to increase ten-fold by 2030 .....	14
Positioning of RNG in other importing regions .....	16
3. Market push: Five major trends are shaping the sector .....	17
3.1 RNG is in demand by cities, major corporations, industrial users, fleet owners and gas utilities all over the world.....	17
3.2 The use of RNG as a vehicle fuel is leading development across the world.....	19
3.3 Bio-hydrogen is emerging as a new outlet for biomethane .....	21
3.4 Energy Majors accelerate their investment in the RNG sector .....	23
3.5 RNG is attracting new sources of capital .....	23
4. Europe is leading the global RNG sector .....	26
4.1 Production reached 3 bcm in 2020.....	26
4.2 The dynamism of national markets across Europe remains quite heterogeneous .....	27
4.3 Due to its versatility, RNG has a wide range of applications in Europe .....	30
4.4 Cross-border trade: Launch of ERGaR CoO Scheme .....	31
Annex: Key developments in major European RNG markets.....	33
Austria .....	33
Denmark.....	33
Finland.....	33
France .....	33
Germany.....	35
Italy.....	35
Netherlands.....	36
Norway .....	36
Sweden.....	37
Switzerland.....	37
United Kingdom.....	37
5. North America: Strong growth in RNG demand.....	39
5.1 United States: Rapid growth in the world's largest RNG producing country .....	39
5.2 Canadian RNG production: strong growth expected boosted by regulation and demand from gas distributors .....	41
6. China's dual carbon target to spur growth in RNG .....	44
7. India is taking action to achieve its ambitious SATAT target .....	46
8. Brazil: on the verge of delivering its huge RNG potential .....	49
Conclusion: A once-in-a-lifetime growth by 2030 .....	52
Main References .....	54
Abbreviations.....	57
List of Figures, Tables and Boxes.....	58
