

# CONTENTS

- Introduction.....3**
- Underground gas storage at the end of 2019 in a nutshell .....4**
- 1. Current capacity of underground gas storage in the world .....5**
  - Global working gas capacity reached 422 bcm in 2019 ..... 5
  - Regional breakdown: North America leads the market..... 6
  - Top Ten league ..... 7
  - Historical evolution: a moderate growth in 2019 for the second year in a row ..... 8
  - Depleted fields dominate, but UGS in salt caverns is key to deliverability..... 9
- 2. Year in review in selected key markets: Europe, Ukraine, Russia and China ..... 12**
  - Europe: unprecedented high stock volumes in storage..... 12
  - Ukraine: UGSs have become attractive for EU shippers and helped rebalance the European market ..... 13
  - Russia: sustained growth in storage deliverability..... 16
  - China: storage development has entered the fast lane ..... 18
- 3. Storage projects ..... 22**
  - An additional 41 bcm of working gas capacity is under construction..... 22
  - Identified projects would add 82 bcm, but remain uncertain ..... 24
- Annex: Methodology..... 27**
- List of Tables and Figures..... 28**
