

CONTENTS

Introduction.....	3
Executive Summary	4
1. Current, under construction and planned capacity of UGS in the world	10
1.1 Current capacity of UGS in the world (end of 2024).....	10
Global storage capacity established a new record in 2024	10
Regional breakdown: North America leads the market	13
Top Ten league	14
The growth rate has returned to pre-2015 levels	14
Global working gas capacity accounts for almost 11% of 2024 gas consumption	15
Depleted fields dominate, but UGS in salt caverns is key to deliverability	16
1.2 Storage projects	19
The pipeline of UGS projects under construction has grown by 42% in just three years	19
Planned and potential projects would add 114 bcm.....	23
2. Major trends by region in 2024 and 2025	27
2.1 Europe: Gas stocks ensured 24% of European gas supply in winter 2024/25	27
EU UGS capacity amounts to one third of EU's annual gas consumption	27
Extension of the Gas Storage Regulation through 2027	28
High utilization of UGS in winter 2024/25	29
Winter supply 2025/26: The EU is well prepared for winter and the following months	33
2.2 Ukraine imports natural gas to offset the consequences of massive Russian attacks	35
Ukraine ended the heating season 2024/25 with historically low stocks	35
Ukraine relies on EU gas imports and is further diversifying its gas sources	36
2.3 Russia adopted an updated energy strategy with planned investments in critical infrastructure	39
Minor changes in UGS metrics since 2019	39
Russia adopted an updated energy strategy to 2050.....	40
UGS is a critical component of Russia's unified gas supply system	40
2.4 United States: An urgent need for more natural gas storage	42
A slight increase in UGS metrics in 2024	42
A new round of UGS development along the Gulf Coast is underway	42
A colder-than-expected winter 2024/25 drained UGS inventories	45
Strong withdrawals expected in winter 2025/26	46
2.5 China: The construction of UGS is still in a period of rapid development	48
China again achieved a strong growth in UGS working gas capacity	48
UGS capacity has more than doubled over the past four years	50
UGS capacity is still insufficient	51
Together with LNG storage, the storage capacity accounts for 13% of 2025 gas demand	52
The crucial role of UGS in the heating season.....	53
2.6 Central and South America, and Mexico, advance UGS projects.....	56
Argentina: Continued investment in infrastructure, including in innovative storage models	56
Brazil: First UGS facility of the country to be launched at the end of 2025	57
Mexico: The new government is expediting UGS construction	59
2.7 The Middle East needs to accelerate the construction of UGS.....	61
Iran: The ongoing expansion of gas storage facilities will help meet peak winter demand.....	61
Saudi Arabia: First deliveries from the Hawiyah Unayzah gas storage.....	62
UAE: Expansion of strategic gas storage facilities	62
The Arab Energy Organization calls for accelerating the construction of UGS	63
Annex: Methodology	64
List of Tables, Figures, and Boxes	65
